

# RHAPSO

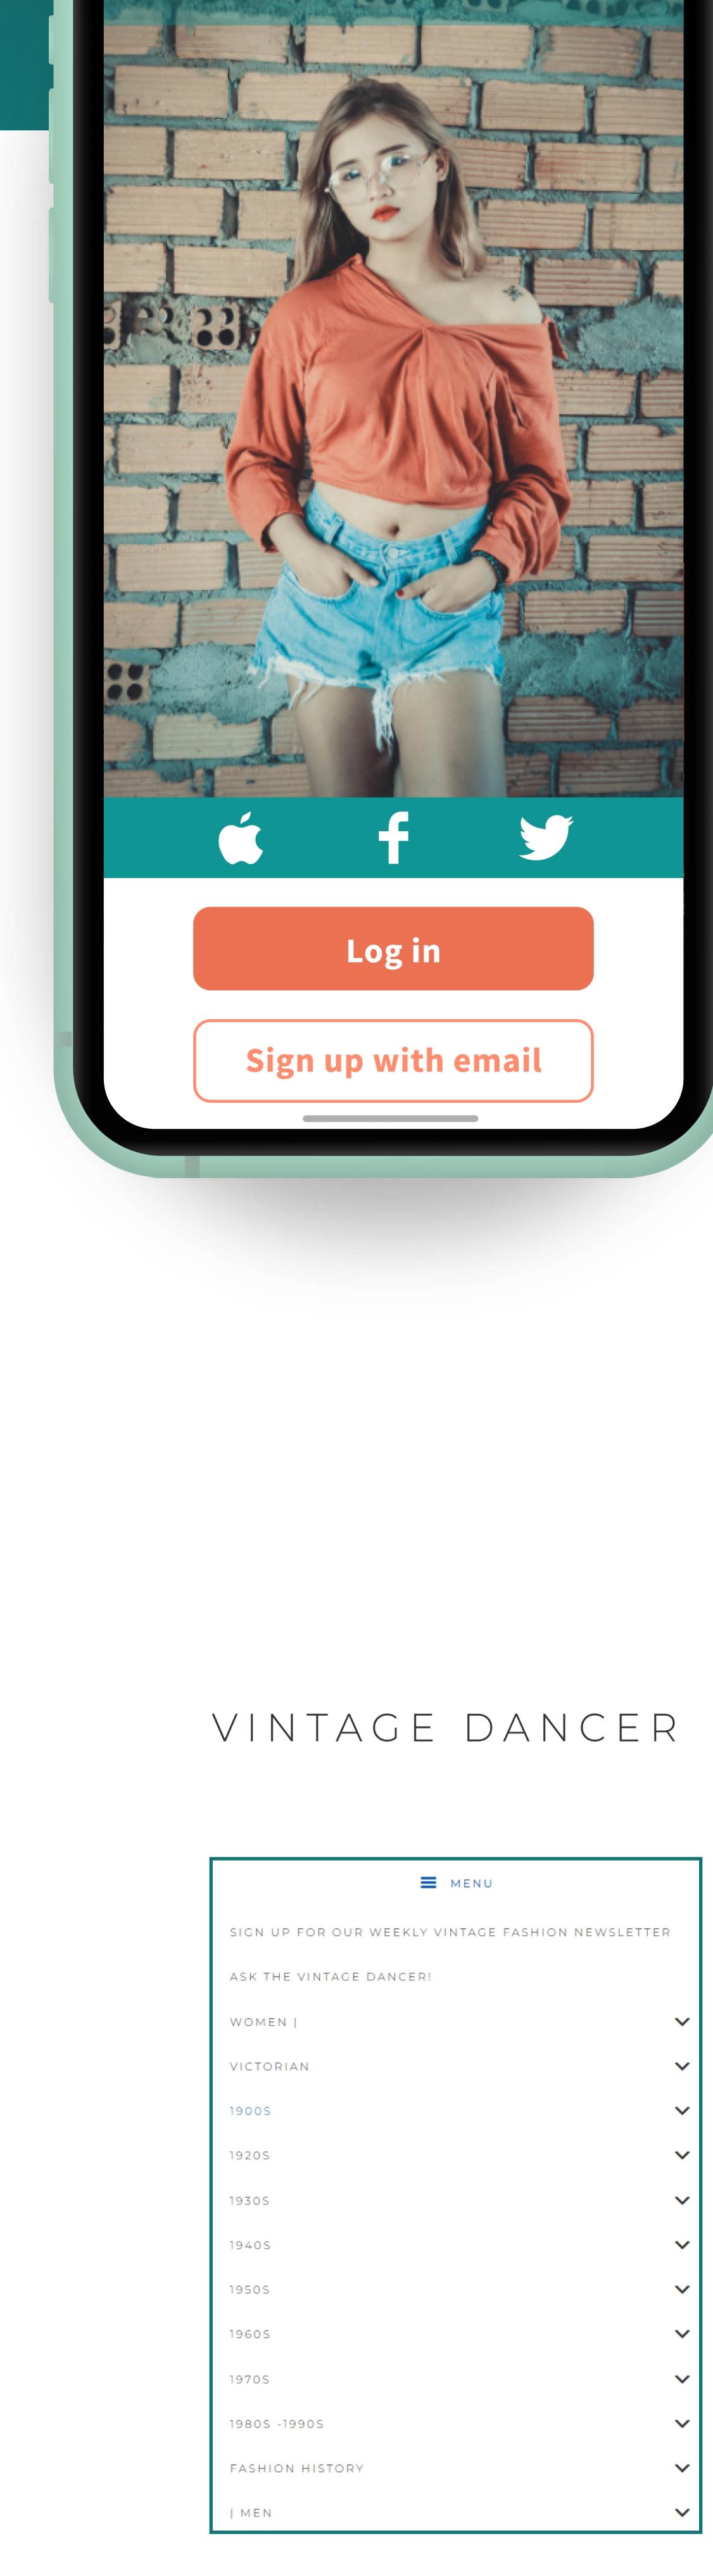

Giving vintage clothing a second life

Browse your favorite fashion eras and find your next treasure

Get great deals for your old wardrobe

Sell your custom designs

## Competitor Inspiration

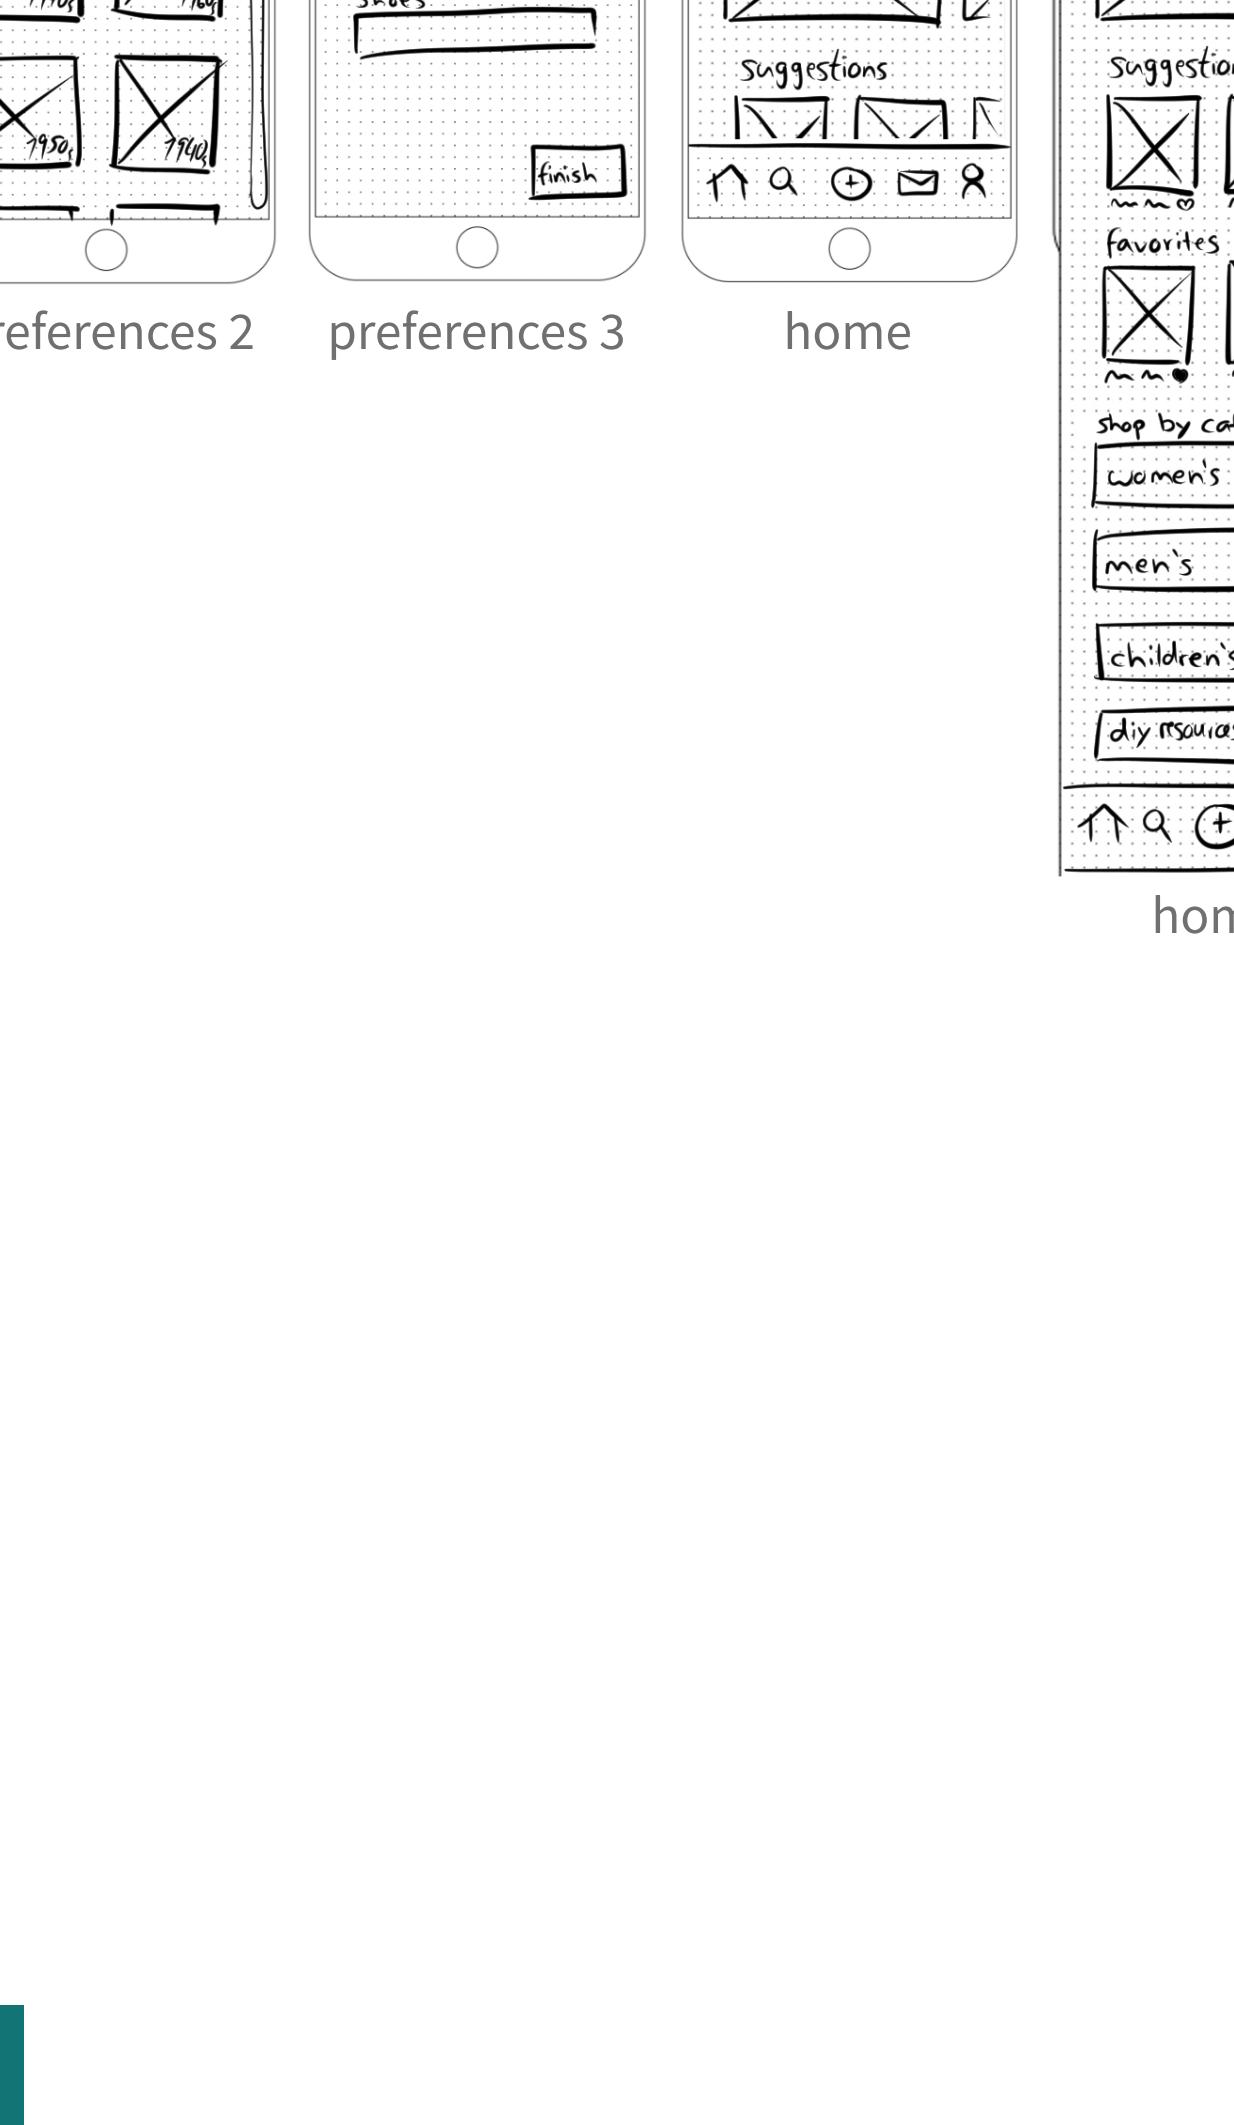

### Vinted

Vinted provides a good product overview when browsing, displaying the most relevant information (price, size) and the possibility to like an item.

The user can provide information on what they are generally looking for (sizes and categories) to increase the accuracy of search results and suggested content.

### depop

Depop also lets you select the categories, styles and sizes you are generally looking for to improve search results and suggested content. The app does so in a visually appealing way with large images.

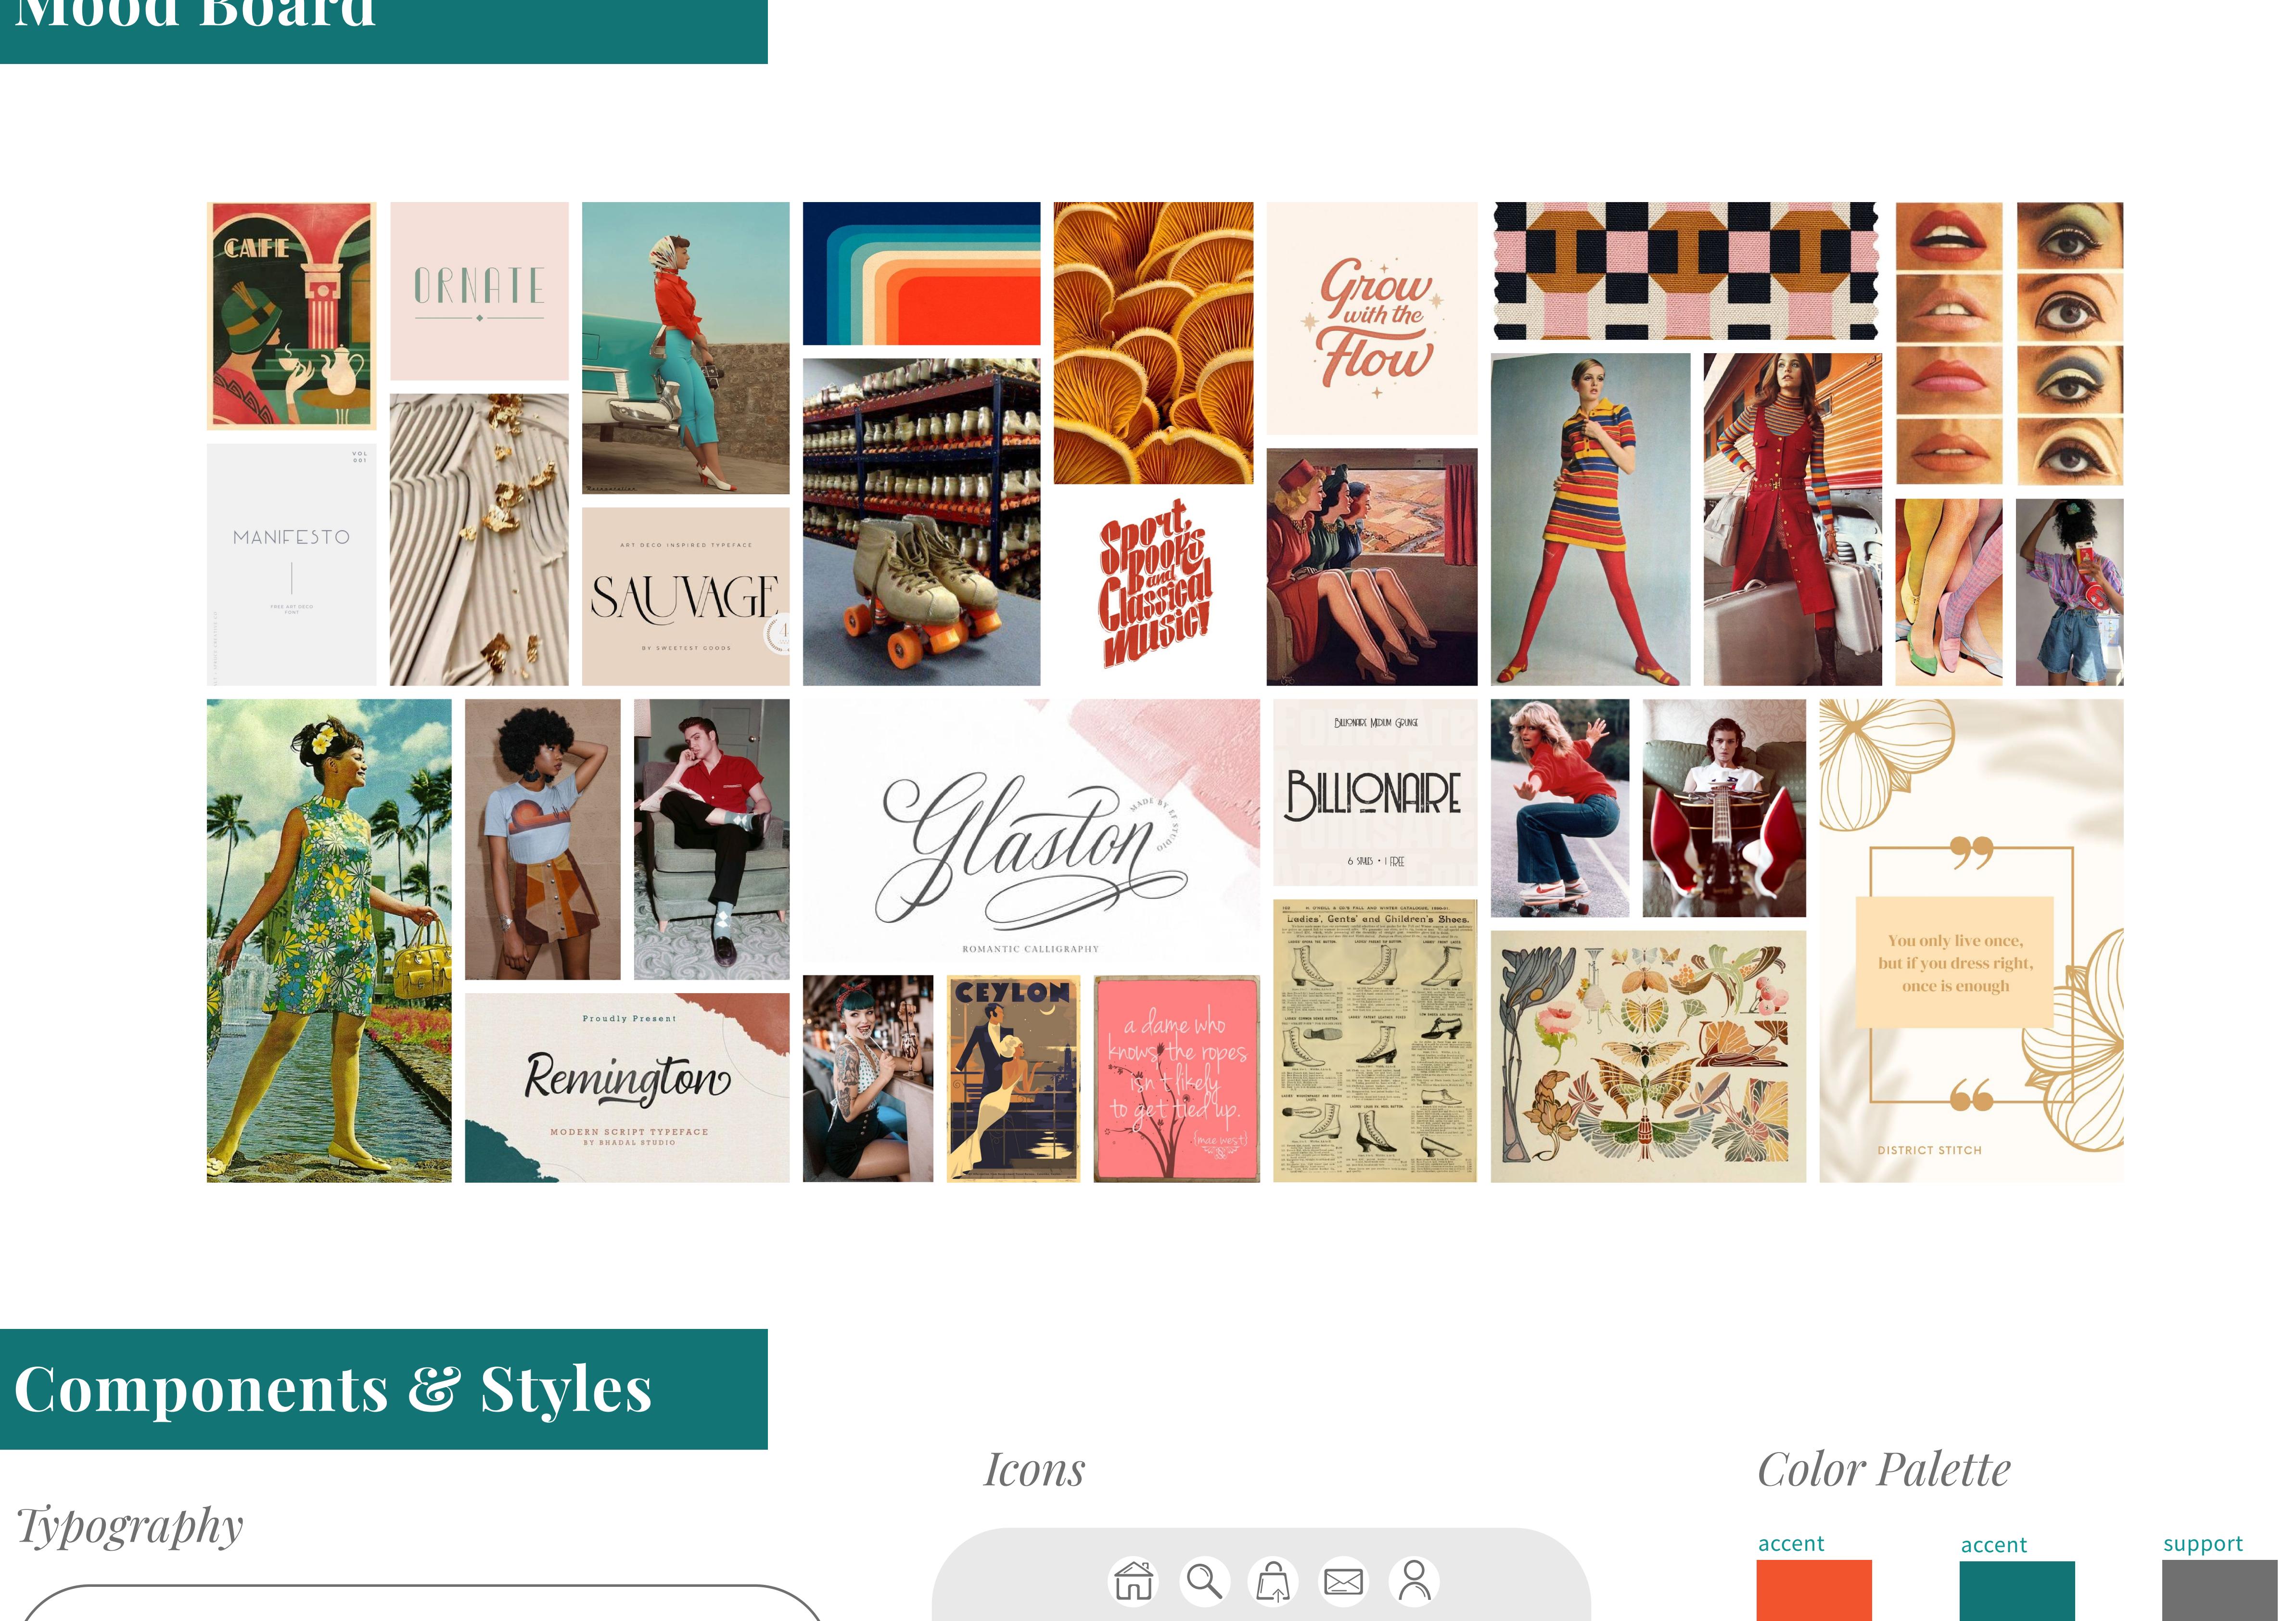

Suggested content is presented in squares of varying sizes in a specific pattern, maintaining a clean and structured look but breaking up the typical rows and columns enough to make it more interesting.

### VINTAGE DANCER

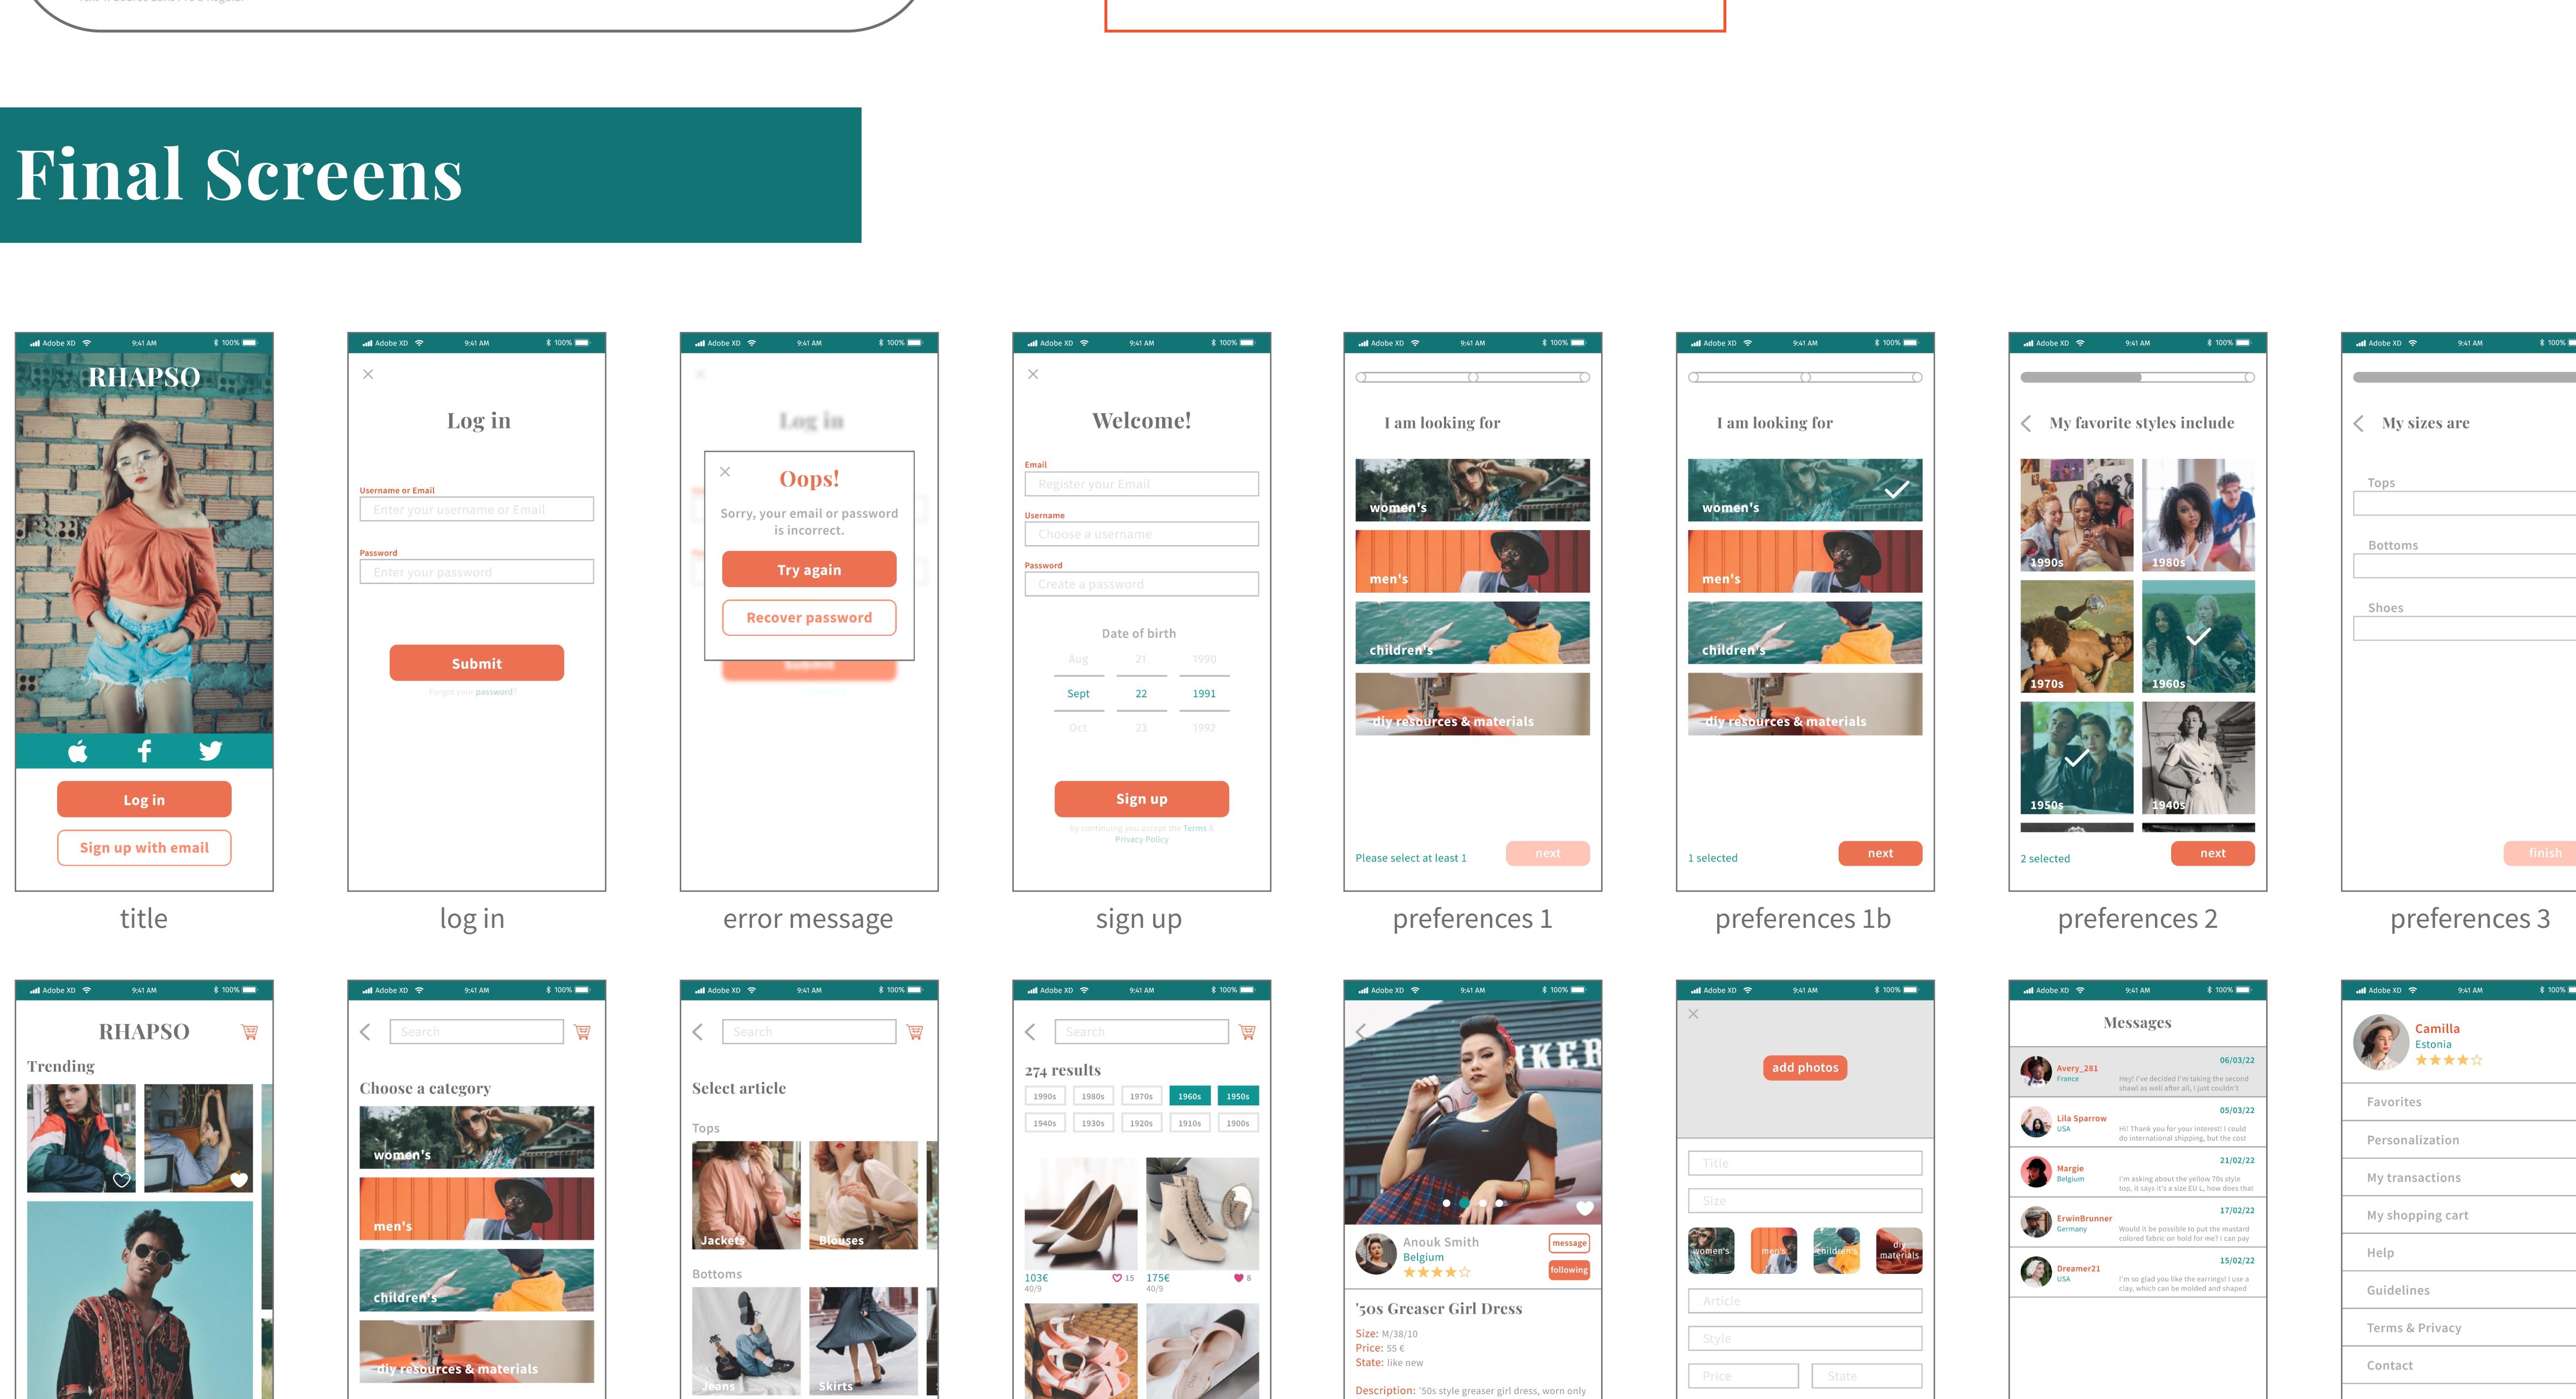

Vintage Dancer is not a mobile app but a website dedicated to era fashion. Users choose between fashion of different eras instead of between specific fashion brands.
